VOLUNTEER CONSULTING

REDACTED Health Information Services Non Profit

September 2014 – Present
New York, NY

UX/UI Developer

- Performed multifunctional "UX/UI Developer" role, serving as sole UX Designer, Front End Developer, and Graphic Designer across the entire new build of the website.
- Performed 6 stakeholder interviews to garner an understanding of the organization's design priorities.
- Generated a full set of responsive Omnigraffle wireframes, using the current development site as a basis for the site's core components
- Translated wireframes into HTML, CSS, Javascript and PHP code, working with the development team to redefine data models and PHP content control where needed to fit wireframes.
- Work scheduled to be live end of December 2014

WORK EXPERIENCE

JPMorgan Chase & Co

July 2012 – Present
New York, NY

Lead Developer (As of February 2014)

- Developed UI code in python for a new securities analytics application, including generic templates for extensibility.
- Developed back end support for daily pricing feeds interfacing with an internally developed SQL based DBMS.
- Lead a team of 8 developers across 2 teams to deliver the 3rd, 4th and 5th releases a securities revaluation project.
- Wrote technical documentation describing price testing calculations for multiple applications across my team.
- Organized and led several major meetings (up to 39 people) with both internal and external business partners across Wall Street.

GWU Instructional Technology Lab

March 2011 – December 2011
Washington, DC

MS Surface Development Intern

- Pioneering multi touch, NUI based software applications for the Microsoft Surface.
- Developed a 3D campus map application based on a Bing maps control, using C# and XAML.
- Wire-framed and developed a multi touch, interactive tutoring application.

University of Maryland (UMBC)

May 2011 – July 2011
Baltimore, MD

DREU Research Fellow (Paper published in TEI 2012)

- Conceived and developed a software system for blind individuals to automatically and rapidly generate tangible 3D derivatives of traditional 2D graphs using 3D printers.
- Integrated three major open source projects via Python and OpenSCAD scripts.
- Conducted user studies to garner feedback from visually impaired professionals in economics, statistics, and technology.

Disaster Accountability Project

May 2010 – July 2010

Web Development and Graphic Design Intern

New York, NY

- Developed PHP, HTML, and CSS code for the prototype of the new Disaster Accountability website.
- Graphic design included a conference poster, pamphlet, and invitation card for a conference, all done in Photoshop.
